For Director General ASNO  

F.ASO112.4-21Jan2011
Explanatory Notes

Ref No ...................... A sequential reference number is required for each form of this type submitted by the Permit Holder (eg 001, 002, 003 etc). Where amendments are made to a previously submitted form, please use the same reference with a sequential revision number (eg 2005-003 Rev 1).

Associated items ........ Includes associated material (heavy water and graphite), associated equipment (eg, reactors, Zirconium tubes) and associated technology (SILEX laser enrichment technology).

Earliest date the Proposed Location would be used......... Approval must be granted before nuclear material or associated items are introduced into the new location. Approvals are typically granted within:

(a) 7 working days for proposed locations holding nuclear material; and
(b) 20 working days for proposed locations holding associated items.

Proposed Location details.................. A map or other relevant information clearly identifying the proposed location should be attached to this form as part of the formal application.

Material Category........ Options are D (depleted uranium), N (natural uranium), L (uranium enriched to <20%), H (uranium enriched >20%), P (plutonium), T (thorium), W (heavy water), or G (graphite).

Updated control measures to be applied to the proposed Location .... Plans and procedures should be attached as applicable. Changes to the accountancy and control procedures, and the security arrangements, shall be fully implemented prior to any nuclear material or associated items being held at the Approved Location.

Applicant’s signature. This form must only be signed by an individual authorised by the Permit Holder to provide this application, notification or report.

This form replaces the following forms ➔ ASO112 (version 3 - issued 22 July 2010) and ASO116
