

Australia Awards Global Tracer Facility

Global Tracer Survey 2022 Maldives Country Report

Outcomes Summary

This country report details the responses of alumni from the **Maldives** to the Australia Awards Global Tracer Facility's 2022 **Global Tracer Survey**. The Global Tracer Survey was conducted in November and December 2022.

Alumni were asked a range of questions via an online survey, focussed on exploring the long-term outcomes of the Australia Awards. In total 5,116 alumni from more than 108 different countries participated in the survey. A 24% response rate was achieved globally. This report focuses on the response data of alumni from the Maldives.

The summary text below provides insight into alumni responses in relation to the Australia Awards Program Outcomes. In addition to the summary below, the report contains detailed tables with data aligned to the Global Performance Targets. These data tables are intended for country programs to be able to use as a resource for reporting of their Core Country Program Indicators.

For **Maldives**, there were 354 alumni included in the target population. Responses were received from 73, a **response rate of 20.6%**. Of those who responded, 59% were women and 3% identify as having a disability. A total of 18% of these alumni hold a leadership role in their community and of those alumni employed, 67% indicated that they hold a formal leadership role in their work.

The survey data provide a valuable quantitative insight into alumni use of knowledge and skills, development of networks and contribution to cooperation with Australia. The responses also offer rich examples from alumni of the types of contributions they are making, the way in which they are using their award, and the things that help and hinder them in reaching their potential.

The goal of the Australia Awards is 'to support partner countries to achieve their development goals through education and knowledge transfer and to build enduring relationships with Australia that advance mutual interests'. The results of this survey are shown in this report with reference to the long-term program outcomes of the Australia Awards. the following summary offers findings based on the responses of alumni from the Maldives. Further findings are included in the infographic following this summary.

Program Outcome 1: Alumni use their skills, knowledge and networks to contribute to sustainable development.

Most alumni from the **Maldives** (94%) indicated they have **passed on their skills and knowledge** to their colleagues and 100% indicate that they have improved the organisations they work on since return from their award.

¹ See https://www.dfat.gov.au/sites/default/files/australia-awards-global-monitoring-evaluation-framework.pdf for detailed information about the long-term outcomes.

Furthermore, alumni are using their new knowledge and skills to **improve their communities** (93%), contribute at a **national level** (90%) and make contributions at a regional or **global level** (70%).

Program Outcome 2: Alumni contribute to cooperation between Australia and partner countries.

34% of alumni from the **Maldives** have maintained frequent contact with other scholarship/Australia Awards alumni, while 12% are in frequent contact with Australian students/alumni.

Of those responding to the Global Survey, 10% have frequent contact with the lecturers/academics from their host institution, and 14% with Australian Embassies, High Commissions or Consulates, or with their local Australia Awards office.

75% of alumni from the **Maldives** indicated they have developed a professional partnership with Australians or Australian organisations since returning from award.

Support for returning home

This Global Tracer Survey included a new focus on alumni reintegration and support on returning home. For alumni from the **Maldives**, 15% indicated that they had participated in a reintegration-type program as part of their return from award. Of those who participated in a program, 70% said this program was provided by the local Australia Awards Program, and 30% indicated it was provided by the Australian High Commission or Embassy.

In addition to this Outcomes Summary, this report includes an infographic as well as data tables including the detail of respondents from the **Maldives** to the Global Tracer Survey. As noted earlier, the data tables correspond to the Australia Awards Global Performance Targets, they include benchmark data from the entire survey response population.

As I am working in the higher education sector I am able to apply the knowledge I have gained during my degree in my teaching and management aspects I undertake with regards to higher education. I am involved in overseeing governance aspects of the HE Institution I am currently working and the data management and record management aspects I learnt during my programme is immensely beneficial and have used to improve the processes, which ultimately improve the services we give to our students.

I volunteer to Local NGOs and take session to the community. This is one of the ways I am able to contribute to the community.

I have been teaching as a volunteer in Maldives National university.

I coordinated the first ever Physiotherapy course in the Maldives, and teaching through the Maldives National University.

A good connection I made was becoming friends with many other development practitioners such as myself in the Maldives. It has made networking easier including communication with other key stakeholders.
