Introduction

This annual *Statistical Summary* provides comparative information on Australia's Aid Program for 2008–2009.

The Australian Government's official development assistance (ODA) or aid program aims to assist developing countries reduce poverty and achieve sustainable development consistent with Australia's national interest.

The 2008–2009 *Statistical Summary* reports on Australia's development cooperation with partner countries, multilateral organisations and non-government organisations (NGOs). It provides a range of information at the aggregate level, including geographical and sectoral statistics.

Australia's official development assistance (ODA) increased by 13.8% in real terms from 2007–2008 to 2008–2009. Over the same period, humanitarian, emergency and refugee aid rose by 18% to \$546 million. Total Australian ODA being delivered through multilateral organisations rose 26% to \$1,305 million, while Australian ODA being delivered through Non Government Organisations (NGOs) rose 18% to \$312 million.

Program structure

The majority of the Australian Government's aid program (81.9% in 2008–2009) is delivered through the Australian Agency for International Development (AusAID). For this publication, the aid resources managed by AusAID are reported by Country and Regional Programs, Global Programs, and Departmental Expenditure. AusAID's Country, Regional and Global Programs, are then further broken down into subsidiary elements for more detailed reporting.

Australian ODA also includes aid activities funded by the Australian Centre for International Agricultural Research (ACIAR), and other Australian Government and State and Territory government departments and agencies (collectively known as other government departments or OGDs), under their own programs. These organisations also participate in the delivery of many activities funded by AusAID.

The 2008–2009 *Statistical Summary* provides statistics across all Australian public sector aid, whether funded through AusAID or the OGDs.

Concepts and definitions

The concepts and definitions used in this *Statistical Summary* are for the most part consistent with the Statistical Reporting Directives of the Development Assistance Committee (DAC) of the OECD and are outlined in Appendix 1.

This publication reports on ODA in line with the definitions in Appendix 1. Only assistance to those countries included in the DAC's List of Aid Recipients can be considered ODA. (See Appendix 2 for DAC list).

The sectoral breakdown of Australia's aid uses the DAC's sector code descriptions and is an indication of the sector primarily benefiting from a particular activity. All activities, both AusAID's and those managed by OGDs, have been classified according to their DAC sector.

This publication includes information on the ODA/GNI ratio. In 1998, the Australian Bureau of Statistics changed its measure of the amount of national economic activity from Gross National Product (GNP) to Gross National Income (GNI), in line with international standards. In 2009, the Australian Bureau of Statistics recalculated Australia's GNI for 2008–09 and all prior years in line with changes in international standards. This increased Australia's calculated GNI, and consequently reduced Australia's ODA/GNI ratios (table 3). As Australia's ODA / GNI ratios shown in this edition are calculated using the new standards, figures reported may differ from those published in previous years.

A list of abbreviations and symbols used in this publication is at Appendix 3.

Comparability with other AusAID publications

The methodology for compiling statistical information differs in some instances between this and other AusAID publications, including the annual ministerial statement on the aid budget and AusAID's Annual Report.

At a macro (or total ODA) level, the data in AusAID's publications match. Due to some divergence in compilation methods and the classification of some activities, there are differences at the detailed level.

Comparability with other donor countries

Statistics in this publication are stated in Australian dollars and reported on an Australian financial year basis (from 1 July to 30 June of the following calendar year). This may restrict, in some instances, a direct comparison between Australia's development cooperation and that of other donor countries.

However, Australia reports its development cooperation to the DAC in United States dollars on a calendar year basis to facilitate comparability between donor countries. This includes statistical information at the activity level, which can be accessed through the DAC's web site at <http://www.oecd.org/dac>. Note that fluctuations in exchange rates between the US and Australian dollars will impact on levels of Australian aid reported across different publications.

A summary comparison of aid flows from individual OECD countries is provided in Table 19 and a table of exchange rates is available at Appendix 4 of this Summary.

Sources of data

The statistical information in this publication is primarily sourced from AusAID databases and is based on data extracted in December 2010. Any revisions made to historical data after January 2011 will be reflected in future publications.

Statistical information on other donor countries' development assistance is sourced from the DAC.

Report layout

The tables and diagrams in this publication are presented in Sections 1 to 4. Section 5 provides explanatory and technical notes in four appendices.

Section 1 provides summary information on the entire Australian aid program for financial years 2006–2007 to 2008–2009. It includes details of Australia’s development cooperation by program element, partner country and sector.

Section 2 provides more detailed information on Australia’s development cooperation with partner countries over the same period.

Section 3 provides supplementary information on various aspects of Australia’s development cooperation, including delivery through NGOs and multilateral organisations, and the destinations of Australia’s humanitarian, emergency and food aid.

Section 4 provides an overview of all aid to developing countries provided by the member countries of the OECD.

Key Statistics 2006–07 to 2008–09

Geographic Focus

Australia's development cooperation continues to focus on the Asia-Pacific. Main regions of assistance were:

Aid by region (A\$m)			
	2006–2007	2007–2008	2008–2009
PNG and Pacific	777	867	953
East Asia	763	953	1,042
South Asia	180	287	348
Sub-Saharan Africa	66	88	174
North Africa and Middle East	439	76	420
Other Regions and World Unallocated	765	876	920

(Refer table 4)

Humanitarian

Australia's humanitarian, emergency and refugee assistance totalled **\$546m** in 2008–09 inclusive. The partner countries with the highest total level of Australian support in 2008–09 were:

Humanitarian, emergency and refugee assistance by partner country (A\$m)			
	2006–2007	2007–2008	2008–2009
Afghanistan	76	136	115
Mynamar (Burma)	7	32	35
Pakistan	11	15	35
Iraq	22	22	32
Zimbabwe	4	0.5	31
Sri Lanka	18	15	25
Palestinian Admin. Areas	12	19	18
Cambodia	9	8	14

(Refer table 13)

The \$546m of 2008–09 expenditures also included \$136m which could not be allocated to individual countries or regions: mainly major payments to support the global operations of humanitarian multilateral organisations, particularly in the UN system.

Sectoral Focus

Aid by DAC sector category (A\$m):

Aid by sector (A\$m)			
	2006–2007	2007–2008	2008–2009
Government and Civil Society	711	788	764
Humanitarian Aid	227	342	476
Action Relating to Debt*	528	28	326
Education	186	300	318
Health	187	232	266

(Refer tables 7 and 10)

* Primarily debt relief to Iraq in 2006–07 and 2008–09, and a contribution to the Multilateral Debt Relief Initiative in 2006–07

Partner Countries

From 2006–07 to 2008–09, the top eight recipients of Australian ODA were:

Aid by partner country (A\$m)			
	2006–2007	2007–2008	2008–2009
Indonesia	336	424	442
Papua New Guinea	338	375	392
Iraq*	386	22	367
Solomon Islands	235	238	217
Viet Nam	84	103	114
Philippines	71	103	128
Afghanistan	77	138	156
Timor-Leste (East Timor)	100	90	114

* includes debt relief to Iraq of \$363m in 2006–07 and \$297m in 2008–09

(Refer table 4)

Multilateral Flows

For 2008–09, Australia's International Development Cooperation through multilaterals totalled **\$1,305m**. The top five multilateral recipients for the period 2006–07 to 2008–09 were:

Aid by multilateral (A\$m)			
	2006–2007	2007–2008	2008–2009
World Bank	321	434	508
Asian Development Bank	112	140	98
World Food Programme	54	87	174
United Nations Children's Fund (UNICEF)	63	60	104
United Nations Development Programme	43	62	73

(Refer table 17)

NGO Flows

For 2008–09, Australia’s International Development Cooperation through Non Government Organisations totalled **\$312m**. Expenditure by program element was:

Aid by program element (A\$m)			
	2006–2007	2007–2008	2008–2009
Country and Regional programs	90	124	168
Humanitarian, Emergency and Refugee programs	45	67	60
Health, Population and Gender programs	4	7	14
Environment and Climate programs	2	4	0
NGO & Volunteer programs	41	52	59
Other programs	6	10	12

(Refer table 14)

2008–09	3,799.50	3,799.50	13.80%	0.32

(a) Annual ODA flows at current prices are derived on the same basis as AusAID's annual Budget Statement. Note that due to more complex and more accurate accrual adjustments to ODA flows in Budget calculations, the annual totals in Table 3 above can vary from the annual ODA in other tables in this Summary.

(b) Constant price figures are derived using Non-farm Implicit Price Deflators from the Australian Bureau of Statistics. These have been rebased to 2008–2009 and are listed in Appendix 4.

(c) National Income is calculated using GNI (Gross National Income) rather than GNP

(d) ODA/GNI ratios are those listed in the 2010–2011 AusAID Budget Statement (Blue Book)

(e) Australian Government contributions towards educating private students from developing countries in Australian tertiary and secondary educational institutions were included for the first time in 1983–84

(f) In 1988–89 there was a one off bringing forward of multilateral development bank payments. This had the effect of increasing 1988–89 but decreasing 1989–90 expenditure.

(a) The total of Official Development Assistance to countries eligible for development cooperation

(b) Other includes a range of programs, including AusAID's Departmental costs

(c) Regional and other includes regional expenditure and countries in the region with expenses under \$100,000 in 2008–09

(d) Includes large core payments under the Global programs to major multilateral organisations with global responsibilities. These Core payments support the overall operations of these organisations across the world, without being earmarked to a particular purpose. They are therefore allocated to "Global unspecified" rather than a particular country or region.

(a) The total of Official Development Assistance to countries eligible for development cooperation

(b) The sector categorisation in this table is based on sectors defined by the Development Assistance Committee (DAC) of the OECD

(c) Regional and other includes regional expenditure and countries in the region with expenses under \$100,000 in 2008–09

(d) Includes large core payments under the Global programs to major multilateral organisations with global responsibilities. These Core payments support the overall operations of these organisations across the world, without being earmarked to a particular purpose. They are therefore allocated to "Global unspecified" rather than a particular country or region. Also includes AusAID's departmental costs within the sector category of Admin costs of donors.

Section 5

Explanatory and Technical Notes

Appendix 1

Concepts and Definitions

Accrual Accounting: The Australian Government moved to an accrual accounting framework in 1999–2000. As part of this framework Australian Government expenditure, including AusAID expenditure, is calculated on an expenses basis for internal government budgeting and expenditure purposes.

AusAID Programs (also known as Programs): The Australian Government aid managed by AusAID is delivered through a number of AusAID Programs, which are the major managerial, administrative and accounting framework within which these Australian Government aid funds are deployed. There are three main types of aid delivery program used by AusAID—*Country Programs*, *Regional Programs*, and *Global Programs*.

Cash and Expenses: ODA is measured in terms of cash payments in a given time period, rather than expenses incurred over that period. Thus, for ODA statistics, some AusAID expenditure data needs to be adjusted from the expenses basis used in Australian Government financial records to a cash basis.

In particular, adjustments from expenses to cash are required in relation to expenditure to meet major multi-year liabilities such as commitments to the Asian Development Fund and International Development Association. For each financial year these adjustments *exclude* the expenses recorded in relation to those commitments, but *include* the cash paid under those commitments in that year.

Adjustments are also made for items such as movements in creditors and depreciation.

Co-financing: is any arrangement under which a development activity is jointly funded by the Australian Government and a development organisation outside Australia, such as the World Bank, the Asian Development Bank or the United Nations Development Program.

Constant Prices: These are prices expressed in terms of the price levels prevalent in a chosen base year. The use of constant prices eliminates the effect of inflation on a series of figures, making them directly comparable.

Core and Non-core payments: A core payment is the provision of donor funds to a development organisation without specific conditions as to the use of those funds, so that the organisation can use them for any purpose within its mandate. The funds thus become part of the general financial reserves of the organisation. Non-core payments are those where the donor specifies any aspect of how the funds are to be used.

Country Programs: AusAID has a separate Country Program for each major partner country, which is planned and implemented jointly with the partner government. Each Country Program is an integrated package of mutually agreed activities, developed and implemented under an agreed country strategy. In dollar terms it is often the largest AusAID program delivering benefits in the partner country.

Current Prices: These are prices expressed in terms of the actual price levels prevalent in the year of expenditure. They state expenditure without any adjustment for inflation, and are sometimes known as nominal prices.

Departmental Expenditure: For any Australian Government Department or Agency, Departmental expenditure is the costs of operating the organisation concerned. Departmental expenditure on aid includes such costs as salaries, equipment costs, rent and other running expenses of AusAID in administering international development cooperation.

Development Assistance Committee (DAC): This is the main committee of the Organisation for Economic Cooperation and Development (OECD) on aid matters, and a key forum of major bilateral donors. The key functions of the DAC are to:

- i. adopt authoritative policy guidance for DAC Members;
- ii. conduct periodic reviews of its Members' development cooperation programs;
- iii. provide a forum for dialogue, exchange and the building of international consensus on aid-related policy and management issues of interest to Members; and
- iv. publish statistics and reports on aid and other resource flows to developing countries and related matters, based principally on reporting by Members.

Expenses and Cash: See *Cash and Expenses* above.

Global Programs: These are specialised AusAID programs which deliver development benefits across the developing world. They include contributions to international organisations; emergency, humanitarian and refugee programs; contributions to Non-government organisations (NGOs) and volunteer programs; development education and public information; development research; and the International Seminar Support Scheme (ISSS).

The non-farm implicit price deflator: This is a measure of inflation in the non-farm part of the Australian economy. It provides an index of the overall movement in the prices of goods and services produced in Australia, excluding the farm sector, whether produced for domestic consumption or for export. It is regularly calculated by the Australian Bureau of Statistics.

Programs: See *AusAID Programs* above.

Multilateral Flows: resources channelled via international organisations active in development such as the World Bank, the Asian Development Bank, UN Development Program (UNDP), UN Children's Fund (UNICEF) and World Food Program.

Non-AusAID Expenditure: covers development cooperation funded by *Australian official sector* organisations other than AusAID. It includes aid expenditure by the Australian Government's *Australian Centre for International Agricultural Research (ACIAR)* and other Commonwealth and Australian State Government departments or agencies. It also includes any funding of aid activities by the local government level in Australia.

Official Development Assistance (ODA): Official development assistance is defined as *those flows* to countries and territories on the DAC List of ODA Recipients and to multilateral development institutions *which are:*

- i. provided by official agencies, including state and local governments, or by their executive agencies; *and*
- ii. each transaction of which:
 - a) is administered with the *promotion of the economic development and welfare of developing countries* as its *main objective*; and
 - b) is *concessional* in character *and conveys a grant element of at least 25 per cent* (calculated at a rate of discount of 10 per cent).

Some core payments to multilateral organisations are only partially reportable as ODA. For example, the table below shows the percentage of core payments to the multilateral organisations listed which can currently be counted as ODA. (The percentages can be periodically updated as the proportion of the organisation's work which benefits developing countries changes over time.)

FAO	51%	Food and Agricultural Organisation
GEF	100%	Global Environment Facility
ILO	60%	International Labour Organisation
ITU	18%	International Telecommunications Union
UNESCO	60%	United Nations Educational, Scientific and Cultural Organisation
UNO	12%	United Nations Organisation
UPU	16%	Universal Postal Union
WHO	100%	World Health Organisation
WIPO	3%	World Intellectual Property Organisation
WMO	4%	World Meteorological Organisation

Source: OECD DAC Reporting Directives Annexe 2

Other Official Flows (OOF): official sector transactions to aid-eligible countries or organisations which do not meet the ODA/OA criteria, eg:

- i. grants to aid recipients for representational or essentially commercial purposes;
- ii. official bilateral transactions intended to promote development but having a grant element of less than 25 per cent;
- iii. official bilateral transactions, whatever their grant element, that are primarily export-facilitating in purpose. This category includes, by definition, export credits extended directly to an aid recipient by an official agency or institution (“official direct export credits”);
- iv. the net acquisition by governments and central monetary institutions of securities issued by multilateral development banks at market terms;
- v. subsidies (grants) to the private sector to soften its credits to aid recipients; and
- vi. funds in support of private investment.

Regional Programs: These are specialised AusAID aid delivery programs which deliver an integrated program of Australian government activities across a region (or regions) of interest to Australia. Activities are usually planned and delivered under a single regional program strategy, and usually benefit more than one country. For aid statistics, expenditure is allocated between countries of benefit whenever identifiable.

Technical Cooperation (TC) also known as Technical Assistance (TA):

Technical cooperation/technical assistance can be classified as free-standing or investment-related.

1. Free-standing technical cooperation (technical assistance) comprises activities financed by a donor country whose primary purpose is to augment the level of knowledge, skills, technical know-how or productive aptitudes of the population of developing countries, i.e. increasing their stock of human intellectual capital, and/or their capacity for more effective use of their available factor endowments.
2. Investment-related technical cooperation (technical assistance) is defined as the financing of services by a donor country with the primary purpose of contributing to the design and/or implementation of a project or programme aiming to increase the physical capital stock of a developing country. These services include consulting services, technical support, the provision of know-how linked to the execution of an investment project, and the contribution of the donor's own personnel to the actual implementation of the project (managers, technicians, skilled labour etc.).

1987–88	1.9849	53.0	2003–04	1.2614	83.4
1988–89	1.8296	57.5	2004–05	1.2106	86.9
1989–90	1.7050	61.7	2005–06	1.1535	91.2
1990–91	1.6260	64.7	2006–07	1.0981	95.8
1991–92	1.6012	65.7	2007–08	1.0520	100.0
1992–93	1.5843	66.4	2008–09	1.0000	105.2

2008–09 Constant Price Deflators are derived using the Non-Farm Implicit Price Deflators (IPD's) of Gross Domestic Product provided by the Australian Bureau of Statistics. 2008–09 constant prices are calculated using the following formula:

Where: p (constant) is constant price
 p (current) is current price
 d (current) is the Implicit Price Deflator for the year of the current price
 and: d (base) is the Implicit Price deflator for the base year (Year of constant price conversion)

Then: $p(\text{constant}) = p(\text{current}) \times d(\text{base}) / d(\text{current})$

For example to calculate 2004–05 ODA in 2008–09 constant prices, take the 2004–05 current price (2198.14 — refer Table 3 “Australian ODA”) and multiply it by the IPD for 2007–08 (105.2) and divide by the IPD for 2004–05 (86.9) below:

$$2661.04 = 2198.14 \times (105.2 / 86.9)$$

STANDARD \$US / \$A EXCHANGE RATES

The DAC provides data on ODA expenditure by all OECD members states in \$US terms to allow:

- comparison between states
- the application of standardised statistical measures, and
- aggregation of the data from different members states in relation to geographic areas, sectors and key policy objectives.

For these purposes, and to ensure comparability, all ODA expenditure by members states is converted to \$US relative to standard set of exchange rates between US\$ and the currency of each member state. This standard set of rates is determined and published below.

The standardised \$US / \$A exchange rate provided by the DAC for these international statistical purposes is tabulated below.

TABLE A2: EXCHANGE RATES, UNITED STATES AND AUSTRALIAN DOLLARS

	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
US\$1=AUS\$	1.5497	1.7265	1.9354	1.8413	1.5415	1.3592	1.3128	1.3279	1.1952	1.1975	1.2822
AUS\$1=US\$	0.6453	0.5792	0.5167	0.5431	0.6487	0.7357	0.7617	0.7531	0.8367	0.8351	0.7799
